[38] BULLIARD, Pierre

Herbier de la France ou collection complete des plantes indigènes de ce Royaume, avec leurs details anatomiques, leurs propriétés, et leurs usages en médecine. Paris: Chez l'auteur, Didot Jne, Debure, Belin 1780 [-1798]

6 volumes: col. engraved title, 616 mostly coloured printed plates, 13 indexes

Histoire des plantes vénéneuses et suspectes de la France. Paris: Chez l'auteur, Didot le jeune, Barrois le jeune, Belin 1784. p (i, iii), (i)-x, (1)-177 (Herbier de la France, première division)

Histoire des champignons de la France, ou traité élémentaire, renfermant dans un ordre méthodique les descriptions et les figures des champignons qui croissent naturellement en France. Tome premier [- Tome second, par Bulliard et Ventenat]. Paris: Chez l'auteur, Barrois le jeune, Belin, Crouillebois, Bazan 1791 and Leblanc 1809-1812.

2 vols. p (i), (i-iii), iv-xvi, (1)-368, (i)-ix, (table); (i-iii), (369)-504, (i-iii), 505-540, (i, iii), 541-700, (1, errata): 4 (1 col. printed) plates

Dictionnaire élémentaire de botanique, ou exposition par ordre alphabétique, des préceptes de la botanique, de tous les termes, tant françois que latins, consacrés à l'étude de cette science. Troisième édition revue et corrigée avec le plus grand soin d'après les indications de l'auteur et autres célèbres botanistes. Paris: Chez Leblanc 1812. Folio

p (i-v), vi-xii, (1)-242, (243-250, expl. des planches, corr. & avis au relieur): 10 (9 col. printed) plates

Volbracht 300, 302, 303; Staffleu 905; Uellner 230; Krieger p 36; Gilbert p 54-58; Nissen 296; Great Flower Books p 81-82; Junk Rara p 181. - The complete Herbier de la France in an attractive copy in six volumes. Added is the text in three volumes and the Dictionnaire de botanique. Text of Champignons de la France with pages 1-540 in the original printing and the remaining 140 pages in Xerox.

Pierre Bulliard was born in 1752 and became famous for this herbarium with its important mycological part. The author suddenly died in 1793, when he had completed the printing of all the 602 plates of his Herbarium, with the text for *Plantes veneneuses* and the most part of text for the champignons de la France. The botanist E. P. Ventenat completed the text, using Bulliard's notes. Shortly after printing of the completed volume 2 in 1812, a fire destroyed most of the stock. The work is the first with colour printed plates of fungi.

Bulliard developed his own printing method for coloured copper-engravings. He drew and engraved the plates and mixed the inks. For printing, he superimposed three tint plates, each with the individual tones necessary to print separately the blue, red and yellow of each image. All the plates have tiny holes in the corners to fix paper with needles for sequential printing.

In the first text-volume of the Champignons there are four unnumbered plates. Plates in excellent condition with wide margins and bright colours, very few light browning of plates or spotting. Plates 601 and 602 added in smaller format. Bound in decorative contemporary red hard boards with gilt label on spine, hinges worn. Text of *Plantes veneneuses* and *Dictionnaire botanique* in rubbed and a bit worn old boards, text of Champignons in modern red cloth with old labels. 34 - 38 cm Euro 12000

[39] BURCKHARDT, Hanns

Pilze, mein Hobby. Ein Leitfaden für das Sammeln und Erkennen der wichtigsten Pilze Mitteleuropas. Minden: Albrecht Philler [1965] p (1-4), 5-128: 117 col. photos 108 figs.

Uellner 232 (later ed.); Original paper-cover; 17 cm Euro 5

[57] **CORDIER, François Simon**

Les champignons de la France. Histoire, description, culture, usages des espèces comestibles, vénéneuses, suspectes, employées dans les arts, l'industrie, l'économie domestique, la médecine. Paris: J. Rothschild 1870

p (i-vii), viii-xii, (1)-231, (1)-274: 60 chromolith. plates and vignettes by A. D. Cordier

Volbracht 427; Stafleu 1229; Uellner 284; Krieger 50-51; Nissen 404; Oberlé 726; Vicaire 211. - François Simon Cordier (1797-1874) was a French botanist and physician, who published a small book on fungi with 11 handcoloured lithographs in 1826 - a second edition followed in 1836. Many years later, at the age of 73, Cordier presented this considerably enlarged version with chromolithographed plates by his daughter Aimée Delville-Cordier. Many phrases of the edition of 1826 are repeated verbatim, but the earlier editions are not mentioned. In 1876, after Cordier's death, the book was reissued with a new typography and pagination and called "fourth edition" on the title. It is not clear if this refers to the editions since 1826, or to the different issues since 1870 (a "troisième tirage" was distributed in 1874, cf. Stafleu). On page (v), Cordier dedicates the work to "Chrétien Henry Persoon, créateur de la science mycologique. Son Élève reconnaissant ..." This copy is inscribed by the author to Prof. Duchartre. Nice condition, only very few spotting. Bound in half-leather, original decorated paper-cover preserved. 30 cm Euro 300

[74] **FALCK, Richard**

Prints and documents from the heritage of a great mycologist - Drucke und Dokumente aus dem Nachlass eines großen Mykologen

- Die Bedingungen und die Bedeutung der Zygotenbildung bei *Sporodinia grandis* (1901). Dedicated copy of Falck's first publication for Prof. Klebs
- Die Cultur der Oidien und ihre Rückführung in die höhere Fruchtform bei den Basidiomyceten. Inaugural-Dissertation ... Universität Breslau 1902.

Handwritten manuscript of Falck's dissertation with the text of the introduction and a volume with the plates with original photographs and instructions to the printer..

In addition a printed proof of the text and several leaves with corrections.

- A volume "Zur Characteristic der Oidien" with additional annotated original photographs of the oidia of *Collybia tuberosa*. Some of the illustrations were used in the dissertation.

- A three-page manuscript with the text of Brefeld's recommendation for acceptance of the dissertation, in Falck's handwriting. (Volbracht, MykoLibri No. 570 a has assigned it erroneously to Klebs)

- Die Sporenverbreitung bei den Basidiomyceten und der biologische Wert der Basidie (1904). Correction copy with numerous changes in Falck's hand, with two unpublished original photos of test arrangements.

- Die Lenzites-Fäule des Coniferen-Holzes (1909).

A bound manuscript booklet with about 40 plates with photos and drawn illustrations for Falck's work, including the original photo for "Lenziteskranker Tannenbalken"

- A handwritten note by the mycologist Oscar Brefeld to Richard Falck.

- 2 letters from the mycologist Alfred Möller (Editor of "Hausschwammforschungen") to Falck

- A postcard by Falck's mother: "Mein liebster Richard ..."

- 12 leaves with original mushroom watercolors by Falck's employee Johanna Beyer, partly signed J. B. (cf. Steinsiek pp. 24, 82, 232).

Steinsiek, Peter-Michael (2019): Richard Falck, Mykologe Lebensweg und Werk eines jüdischen Gelehrten (1873-1955). Universitätsverlag Göttingen. Volbracht: Mykolibri. Unique material from the personal library of the German mycologist Richard Falck (1873-1955), specialist in wood-destroying fungi. The Jewish scientist worked at the forest academy in Hannoversch Münden. Many years before Fleming he was the first to discover and describe an antibiotic obtained from *Sparassis crispa*, the fungicide Sparassol, but he did not pursue the discovery any further. In 1933, he fled from the Nazis to Jerusalem, then to Poland and Russia. He finally moved with his extensive mycological library to USA and died in 1955 in Atlanta.

The manuscripts and notes allow a deep insight into Falck's research. Of special interest is the handwritten text of the recommendation for the acceptance of the dissertation by the mycologist Oscar Brefeld, his PhD supervisor. It contains numerous corrections to the text, so it seems reasonable to conclude that Falck could have written the text for the recommendation himself. Brefeld became increasingly blind in 1902.

The documents in original wrappers or new folders, partly disbound. Folio.

Euro 2500

Pilzfürer. Nice copy in original binding; 20 cm Euro 15

[197] **MICHAEL, Edmund & Roman SCHULZ**
Führer für Pilzfreunde. Begründet von Edmund Michael. Systematisch geordnet und gänzlich neu bearbeitet von Roman Schulz. Ausgabe B. 3 Bände mit 386 Abbildungen in natürlichen Farben und Größen. Erster [- Zweiter] Band (...). 5. Auflage (29. bis 36. Tausend). Zwickau: Druck und Verlag von Förster und Borries [1922-] 1924-1926
1: p (1-3), 4-120: 48 plates with text
2: p (1-3), 4-12: 116 plates with text
 Volbracht 1365; Stafleu 5952. - A rarity in the publishing-history of this most successful German mushroom book. This is the widely unknown and rare first issue of the revised edition of the work by Roman Schulz. He took over the project after Michael's death in 1920 and died himself in 1926, having finished two volumes and all the plates. The first volume came out in four instalments from 1922 to 1924, the second in 1926. After Schulz death in October 1926, Bruno Hennig (1893-1972) followed as the main editor. Hennig then added the text of the 3rd volume, as the plates had already been prepared by Schulz. The work was completed and reissued in 1927 by the publisher Quelle & Meyer in Leipzig, with a slightly different title (Volbracht 1365). - This first issue of the two volumes is not mentioned in the bibliographies by Volbracht or Uellner. Stafleu only saw one "copy" of the four instalments of the first volume. The two volumes in orig. dec. cloth, fine condition. 20 cm.

A new edition in one volume, with the very nice photographs
by Waldvogel. Hardcover, dust-wrapper bound in; 29 x 20,5
cm Euro 25

[281] SCHMIERER A. & J. KAMMERER

Unsere wichtigsten eßbaren Pilze nebst einer Abbildung des giftigen Fliegenschwammes, für Schule und Haus. Stuttgart: C. Hoffmann'sche Verlagsbuchhandlung 1889

p (1-10): 8 chromolithographed plates; oblong folio

Volbracht 1913; Uellner 1575; Weiss 3445. - A very rare large format book with a nice cover depicting nains, dancing after their mushroom-hunt in a forest. Weiss (Gastronomia) praises the book as the "probably nicest ever published mushroom-book", - the decorative plates with their unusual black background are indeed charming and well-painted. The text is printed in three columns. With a few old owner-inscriptions from 1891. Title-page a bit darkened, here and there spotted. Binding loosened, in original decorated boards, slightly soiled, one corner broken, but a very good copy of this rare work.

Oblong Folio 35 x 52 cm Euro 750

[282] SCHOPFER, William H.

Recherches sur la sexualité des champignons. Le problème de la biochimie comparé du sexe. Thèse ... Université de Genève. Genève: Imprimerie Jent 1938

[311] **VALSERRES, Jacques**

Culture lucrative de la truffe par le reboisement. Paris: Librairie de la Société des gens des lettres, librairie André Sagnier, librairie Bouchard-Huzard, chez l'auteur 1874

p (i-iii), (i)-xii, (1)-268, (269, table)

Volbracht 2168. - Very rare book on truffles by the president of an entomologic society devoted personally to the "propagande truffière". The book describes exhaustively the knowledge on truffles and truffle-culture 125 years ago. But, in opposition to the prevailing opinion of the Academie des Sciences, the author insists that truffles were galls of truffle-flies and not fungi. ("Pour l'obtenir a volonté, il faut le chène truffière et la mouche truffigène"). Nice copy bound in modern gilt decorated half-leather, golden title on spine. 15 cm
Euro 1100
