**Olga Falck. Reprinted from Palest. Journal of
 Botany Vol V, No 2, 1946**
 263-266

Obituary for Olga Falck, written by her husband Richard
 Falck, with whom she conducted mycological research
 over 40 years. Richard Falck traces her life and her years of
 wandering. The Jewish couple left Germany when fascism
 came to power in spring 1933 and went via Rome and
 Palestine to Poland. Here they worked, until 1939, when
 Germany invaded Poland. So the couple evacuated to the
 USSR, staying in Kiev and then in Khimki near Moscow,
 working for the Academy of Science of the USSR. When
 Hitler's troops invaded the USSR they fled the fascism for the
 third time and were evacuated to Turkmenia. Olga fell ill and
 died in 1944. Her husband then lived with his daughter in
 Palestine and then in the USA, where he died in 1954. 18 cm

Paris: Club du livre & Graz, Akademische Druck- und Verlag-Anstalt 1987
 2 vols. p (i-xi), 12-155; (i-viii): 206 coloured plates
 This is a facsimile reprint of one of the most famous illuminated manuscripts from the Austrian National Library in Vienna. It was elaborated around 1380 for Gian Galeazzo Visconti, the powerful dictator of the Duchy of Milan to illustrate a most important health-book by Ibn Butlan, a Baghdad-born doctor living in Constantinople in the second century of our era. His ‚Tables of Health‘ was a non-illustrated medical household book, in which all areas of life were examined, be it food, climatic conditions, clothing and housing or music, dance and sport. Ibn Butlan also described the truffles he knew, i.e. the desert-truffles of the middle and far-east, harvested in spring and having little flavour. When his book reached Italy in a latin translation, it was illuminated in the 14th Century in the werkstatt of the famous artist Giovanni de‘ Grassi. The artists and illustrators painted the black truffles they knew from Italy. This is the moment when confusion between the pale-brown desert-truffles of the ancient world and our black european truffles began. (cf.: Volbracht: Wie die Wüstrüffeln schwarz wurden. In: Zeitschrift für Mykologie 90/1 2024. p 103-116)
 Several illustrated copies of the work were produced in the art workshops of de‘ Grassi, the one in the library of Vienna is considered be one of the oldest. It contains 206 large hand-painted coloured illustrations on parchment and abridged texts based on Ibn Butlans book. The facsimile-reprint contains a translation and commentary in French and dutch language. These magnificent manuscripts are of great importance in terms of art history. No one before had ever created such true-to-life depictions of everyday life as Grassi in the Tacuinum sanitatis.
 This is one of 1800 copies printed. With an introduction in French and translation of the latin descriptions in French and Dutch language. Bound in half and full blind-stamped calf in special slipcases; 35 cm

[266] PERSOON, Christiaan Hendrik
Icones pictæ specierum rariorum fungorum in Synopsi methodica descriptorum a C. H. Persoon. Fasciculus primus [- tertius]. [Figures coloriées des espèces rares des champignons décrits dans l'ouvrage intitulé: Synopsis methodica fungorum par C. H. Persoon.] Première [- troisième] livraison. Paris & Strasbourg: chez Amand Kœnig 1803-1805

p (i), (i)-ii, (1)-64, (1): 24 hand-coloured plates
Bibliogr.: Volbracht 1585. - Three of four parts of the rarest work by Persoon. The bibliographer Junk described it in 1936 as 'one of the rarest works of botanical literature'. We have parts 1 and 3 from the collection of the French mycologist Lucien Quélet in original hand-colouring. Added is part 2 part in uncoloured state. Originally five parts were planned, but only 4 were realised because of differences between Persoon and his editor Armand Kœnig in Strasbourg. Compare Persoon's autographed letter from end of May 1809 (MykoLibri, page 358.), in which the author claims that Kœnig always preferred more attractive fungi than the species described by Persoon. 'Es find H. König sie immer schlecht und glaubt, alle Schwämme ... müssen den nehmlichen éclat als schöne Blumen und brillante Schmetterlingen haben...' (Kœnig never likes them and believes that all fungi ... must have the same éclat as beautiful flowers or brilliant butterflies'. The three parts with the original covers with the indexes of contents. Title of parts 1 and 3 soiled, otherwise very good internal condition, only slight browning or spotting in places. Plates nice and in very fine colouring, the first ones somewhat wavy. Margins uncut and frayed. Part one with the visiting card of Quélet, with a handwritten note on the two parts in his possession on verso. Folio. 30,5 x 23 cm Euro 2400
